# Jayden Phu

Los Angeles, CA • (626) 417-5067 • jaydentphu@gmail.com • linkedin.com/in/jayden-phu • jaydenphu.dev

## Education

**University of California, Los Angeles** *Anticipated Graduation: June 2028*

*Bachelor of Arts in Computer Science and Linguistics*

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Architecture & Organization, Discrete Structures, Linear Algebra, Multivariable Calculus, Statistics

## Experience

**Moving Dentists Building Legacies** *Yorba Linda, California*

*Lead Software Engineer, AI Automations* *May 2026 - Present*

- Architected a centralized Notion CRM from scratch spanning 6 relational databases, owning the schema and data model as the system of record for equipment sales, dental practice transactions, and customer relationships.
- Shipped 4 LLM agents that parse unstructured business inputs and call tools through MCP and external REST APIs, autonomously maintaining over 600 customer profiles and eliminating 10 hours of manual data entry weekly.
- Built an agentic retrieval-augmented context layer with governance guardrails, pulling live data from Notion and Google Drive at query time with persistent memory, so agents act on current company records instead of static snapshots and run consistently in production.

**Veris Ventures** *Geneva, Switzerland*

*Full-Stack Software Engineering Intern* *Jun 2024 - Jun 2025*

- Built and deployed a Python service that automates dealflow processing, eliminating 5 hours of manual triage of incoming venture deals in cryptocurrency and blockchain startups weekly.
- Integrated Telegram and Notion APIs using python-telegram-bot and notion-client, building a data pipeline that transforms and stores structured dealflow records in a queryable Notion database.
- Evaluated emerging Web3 projects on tokenomics, smart contract security, and market potential to assess project feasibility and inform investment fund allocation.

**Kode for Kids** *Monterey Park, California*

*Founder, President* *Aug 2022 - Jun 2024*

- Founded free, in-person coding programs for underserved middle schoolers, addressing local gaps in accessible computer science education through small-group, collaborative sessions.
- Taught Python and Java fundamentals, guiding students from the first script to a working project of their own.
- Authored lesson plans, organized community events, and ran outreach that grew the program to 100+ participants.

**Building-u Nonprofit** *St. John's, Canada*

*Software Engineering Intern (Frontend)* *Oct 2023 - Feb 2024*

- Collaborated with coding team to migrate an existing codebase's frontend to React and Bootstrap, and built a CRUD employee management interface and API-powered analytics dashboard using JavaScript and DOM manipulation.

## Projects

**Polymarket Trading Bot** – Github | *Python, Telegram Bot API, web3.py, Polygon, Polymarket CLOB, asyncio*

- Developed a Telegram-native social trading platform that integrates Polymarket's API for trading real world events.
- Designed and shipped a production non-custodial wallet handling real USDC, using per-user Polygon Safes and an isolated signing service to prevent withdrawing funds even if an app node is compromised.
- Built real-time social trading features with asyncio, including one-tap copy/fade trade execution, group broadcast cards, and clan leaderboards, using Polymarket's Builders Program for fee-attributed order execution.

## Skills

**Languages:** Python, Java, C++, JavaScript/TypeScript, SQL, HTML/CSS, R
**Frameworks & Libraries:** React (React.js), asyncio, pytest, NumPy, Pandas, web3.py
**Tools & Infrastructure:** Git, REST APIs, Linux, Anthropic Claude API/MCP, Polygon & EVM Blockchain
