Los Angeles, CA • (626) 417-5067 • jaydentphu@gmail.com • [linkedin.com/in/jayden-phu](https://www.linkedin.com/in/jayden-phu) • jaydenphu.dev

Education

University of California, Los Angeles

Anticipated Graduation: June 2028

Bachelor of Arts in Computer Science and Linguistics

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Architecture & Organization, Discrete Structures, Linear Algebra, Multivariable Calculus, Statistics

Experience

Moving Dentists Building Legacies

Yorba Linda, California

Software Engineer, AI Automations

May 2026 - Present

- Architected a centralized Notion CRM from scratch spanning 6 relational databases, creating a governed system of record for equipment sales, dental practice transactions, and customer relationships that AI agents read and write to.
- Shipped four production LLM agents that parse unstructured business inputs to call tools through MCP and external APIs to autonomously maintain over 600 customer profiles and eliminate 10 hours of manual data entry weekly.
- Designed a retrieval-augmented context layer with governance guardrails and documented operating procedures, enabling new agents to execute against current company knowledge and run consistently in production.

Veris Ventures

Geneva, Switzerland

Software Engineer Intern

Jun 2024 - Jun 2025

- Built and deployed a Python bot that automates dealflow processing, eliminating 5 hours of manual triage of incoming venture deals in cryptocurrency and blockchain startups weekly.
- Integrated Telegram and Notion APIs using python-telegram-bot and notion-client, building a data pipeline that transforms and stores structured dealflow records in a Notion database.
- Evaluated emerging Web3 projects on tokenomics, smart contract security, and market potential to assess project feasibility and inform investment fund allocation.

Kode for Kids

Monterey Park, California

Founder, President

Aug 2022 - Jun 2024

- Founded free, in-person coding programs for underserved middle schoolers, addressing local gaps in accessible computer science education through small-group, collaborative sessions.
- Taught Python and Java fundamentals, guiding students from the first script to a working project of their own.
- Authored weekly lesson plans on emerging CS topics, organized community events, and ran outreach that grew the program to 100+ participants.

Building-u Nonprofit

St. John's, Canada

Coding Intern

Oct 2023 - Feb 2024

- Collaborated with coding team to migrate an existing codebase's frontend to React and Bootstrap, and built a CRUD employee management system and API-powered analytics dashboard using JavaScript and DOM manipulation.

Projects

Polymarket Trading Bot – [Github](#) | Python, Telegram Bot API, web3.py, Polygon, Polymarket CLOB, asyncio

- Developed a Telegram-native social trading platform that integrates Polymarket's API for trading real world events.
- Designed and shipped a production non-custodial wallet handling real USDC, using per-user Polygon Safes and an isolated signing service to prevent withdrawing funds even if an app node is compromised.
- Built real-time social trading features with asyncio, including one-tap copy/fade trade execution, group broadcast cards, and clan leaderboards, using Polymarket's Builders Program for fee-attributed order execution.

Skills

Languages: Python, Java, C++, JavaScript/TypeScript, SQL, R, HTML/CSS

Frameworks & Libraries: React, Node.js, asyncio, NumPy, Pandas, pytest, web3.py

Tools & Infrastructure: Git, Docker, Linux, REST APIs, Anthropic Claude API/MCP, Polygon & EVM Blockchain
